SUMMARY

AI-focused Full Stack Engineer with hands-on experience in building LLM-integrated applications, RAG pipelines, and cloud-deployed ML systems. Skilled in Python, React, Spring Boot, and AWS with practical exposure to Dockerized deployments, embeddings, and scalable AI workflows. Passionate about developing AI-native solutions and agentic systems to solve real-world problems.

EDUCATION

SRI KRISHNA COLLEGE OF TECHNOLOGY

Bachelor's Degree in Computer Science And Engineering (Cyber Security) (2022– 2026)
CGPA: 8.1

G.K SHETTY VIVEKANANDA VIDYALAYA SENIOR SECONDARY SCHOOL

10th-84.6
12th-91.1

SKILLS

Technologies: Python, Java (Spring Boot), JavaScript (React), SQL, HTML, CSS, REST APIs.

AI/LLM: RAG (basic), Embeddings & Prompt engineering (foundational), Amazon Bedrock (basic).

AI Orchestration: LangChain, Agent workflows (introductory).

Cloud/DevOps: AWS (S3, EC2), Docker, Git.

Data/ML: NumPy, Scikit-learn, TensorFlow (basics).

Databases: MySQL

INTERNSHIPS

Machine Learning Intern – Giggso India Pvt Ltd/ July 2024

Gained exposure to RAG workflows, Amazon Bedrock, and LangChain (basic) for LLM-based applications; deployed ML solutions using Docker and AWS (S3, EC2); contributed to data retrieval and preprocessing workflows to improve response quality.

PROJECTS

CHANAKYA SHIELD - Network Packet Sniffer with Threat detection and Alert system

- Developed an ML-based system for network traffic analysis and attack detection.
- Implemented ML models (Random Forest, SVM, Isolation Forest, LightGBM) for attack detection.
- Integrated Telegram-based alert system for real-time threat notifications.

AI Knowledge Assistant (RAG-based)

- Built a RAG-based system for document question answering.
- Implemented chunking, retrieval, and LLM response generation for user queries.
- Integrated Amazon Bedrock and LangChain (basic) for building RAG pipelines.

Fitness Tracking & Workout Suggestion Platform

- Built a full-stack app with frontend (React) backend (Spring Boot).
- Used statistical methods to provide personalized workout recommendations based on BMI and past performance.
- Designed database schema and analytics for user performance tracking.

CERTIFICATIONS

- OCI Generative AI Professional - ORACLE
- Cyber Security and Privacy - NPTEL
- Introduction to Cyber Security - CISCO
- How Computers Works - University Of London
- Introduction to Android Mobile Application Development - Meta
